Does the support pose a risk to the health and safety of staff and the community?	
Is the support directly targeted at the care recipient, or does it significantly benefit others, instead of the care recipient?	
How does the support align with the assessed ageing related care needs as documented in the ACAT assessment, the providers' own assessment of the care recipient's needs or an assessment by a health care professional?	
How does the support assist the care recipient to achieve their ageing related care goals, now and in the short to medium term? Is the support necessary to meet the care recipient's ageing related assessed care needs and care goals?	
Has the evidence-base for the support which addresses a particular assessed ageing related care need been considered?	
Does the support require maintenance to ensure the safe use of the item that represents a significant portion of the budget? Is it difficult to provide the maintenance required?	
Is there an opportunity cost associated with the support? Will the care recipient miss out on a support identified in their assessment if package funding is used for a large purchase?	
Can the support be provided informally through the community?	
Does the support represent value for money to meet the care recipient's assessed ageing related care needs?
